ARCHITECTURE & UI SHOWCASE

Virtual Wardrobe Analyzer Portfolio

A complete, high-resolution visual catalog of all 9 pages, modals, styling filters, and rule-based recommendation interfaces in the platform.

Full Visual Audit | 144 Curated Garments | Rule-Based Styling Engine | Color Theory Harmonies | React + Vite | Tailwind CSS | Node.js + Express | SQLite

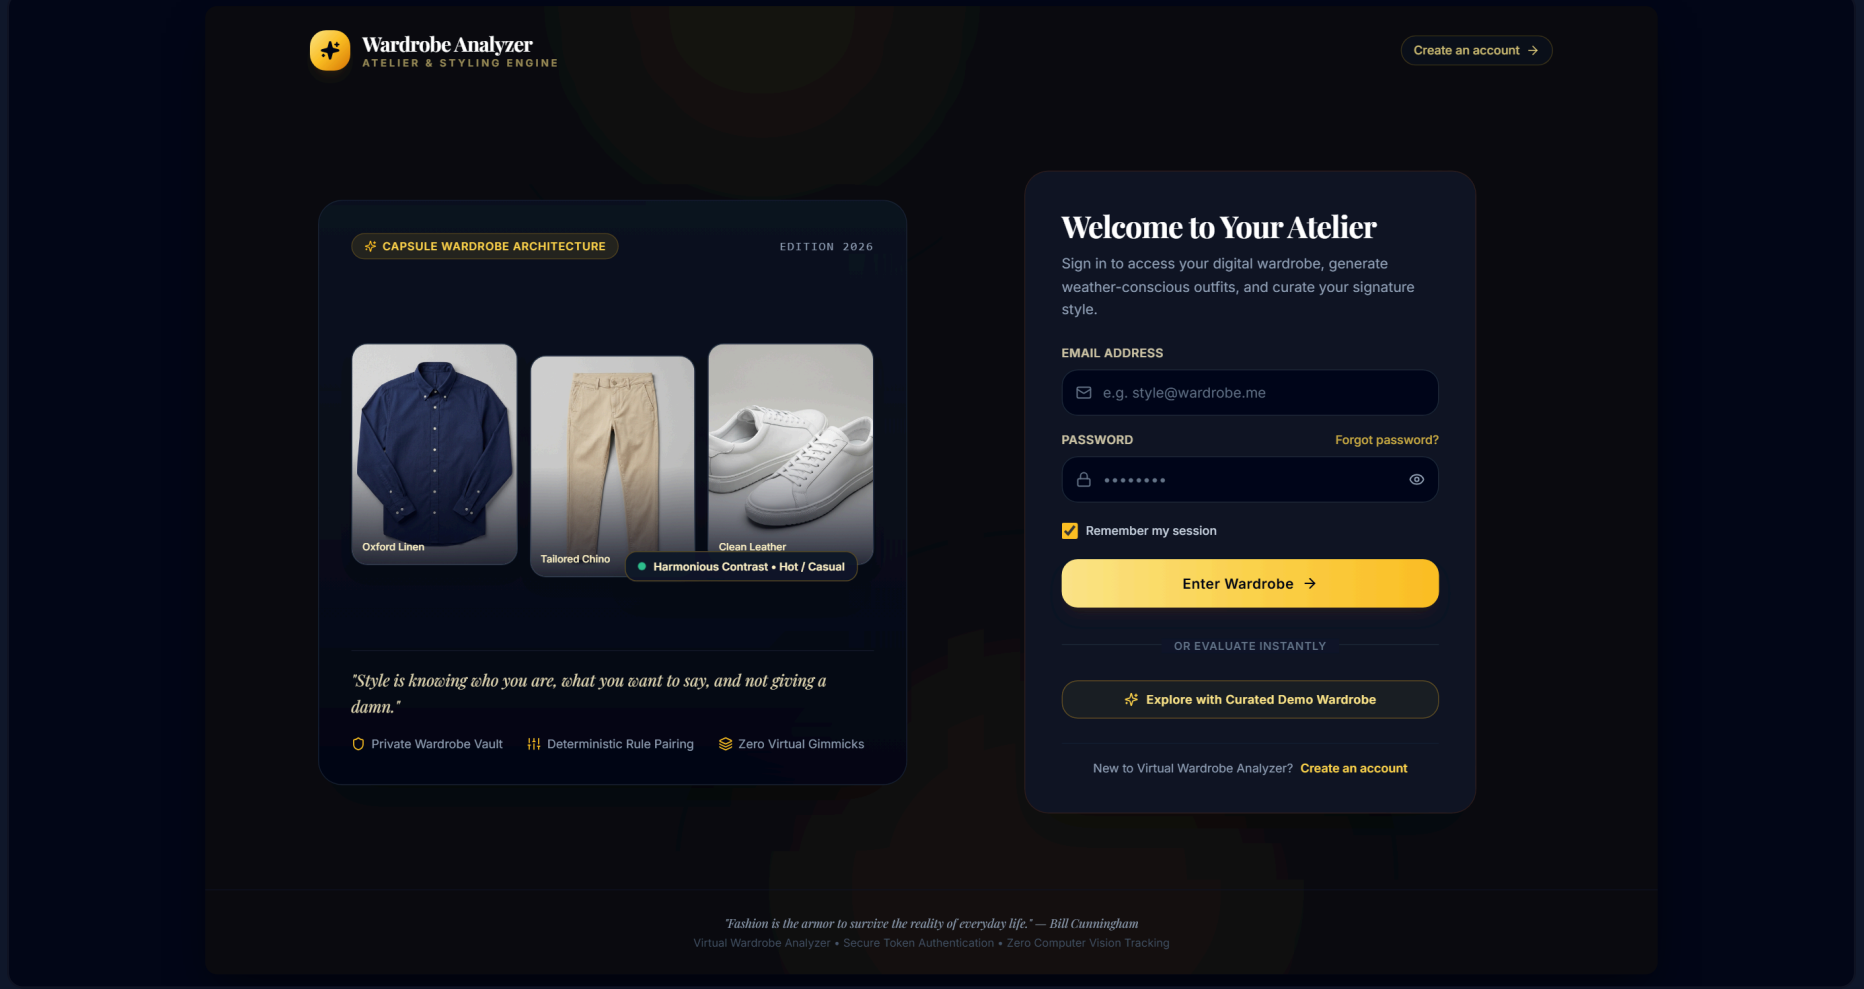

Project Location: D:\Virtual wardrobe Analyzer
Generated: October 2026 • **Format:** High-Resolution Editorial Catalog

Total Screens: 9 Distinct Views
Embedded Assets: 100% Self-Contained Lossless Data

AUTHENTICATION `/login`

01. Atelier Login Portal

VIRTUAL WARDROBE ANALYZER

Dark luxury atelier aesthetic with warm amber and gold accents, client social proof pill, remember-me persistence, and 1-click demo login credentials.

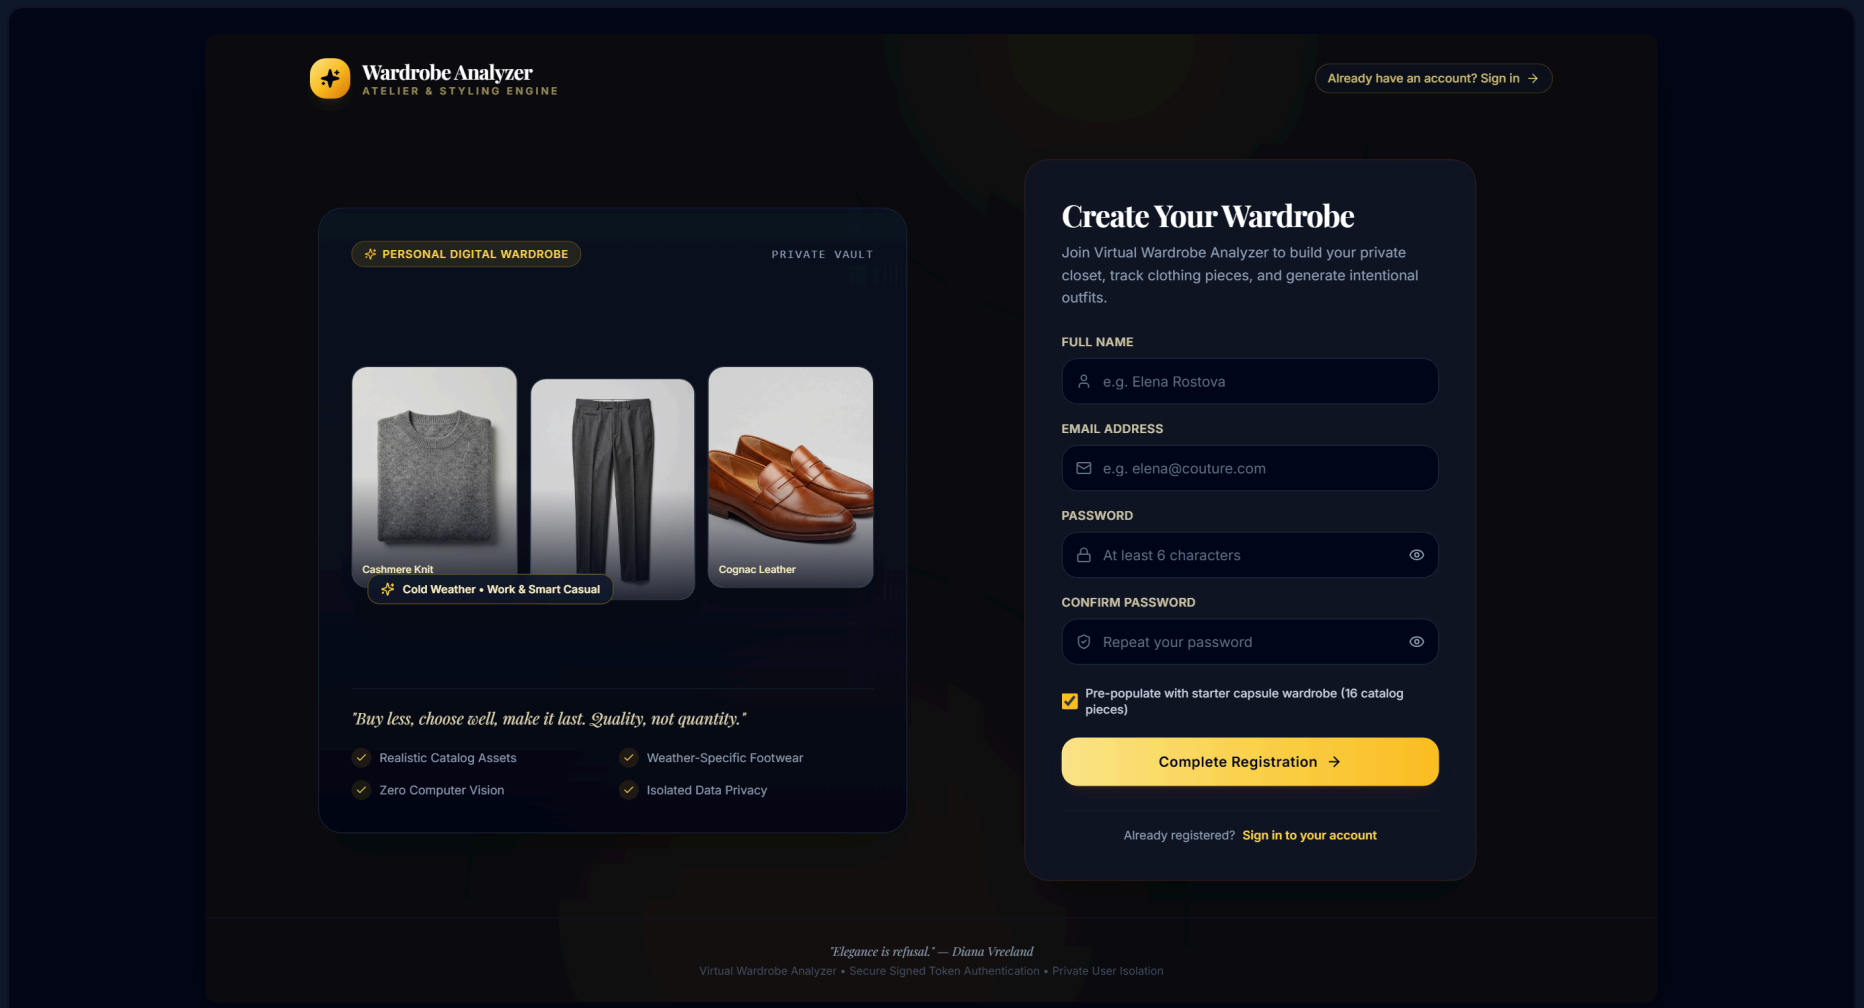

- Warm amber/gold glow on interactive inputs with custom password show/hide toggles
- Instant access pre-fill for demo accounts (demo / demo123)

- Editorial fashion background with atelier mood imagery

ONBOARDING `/register`

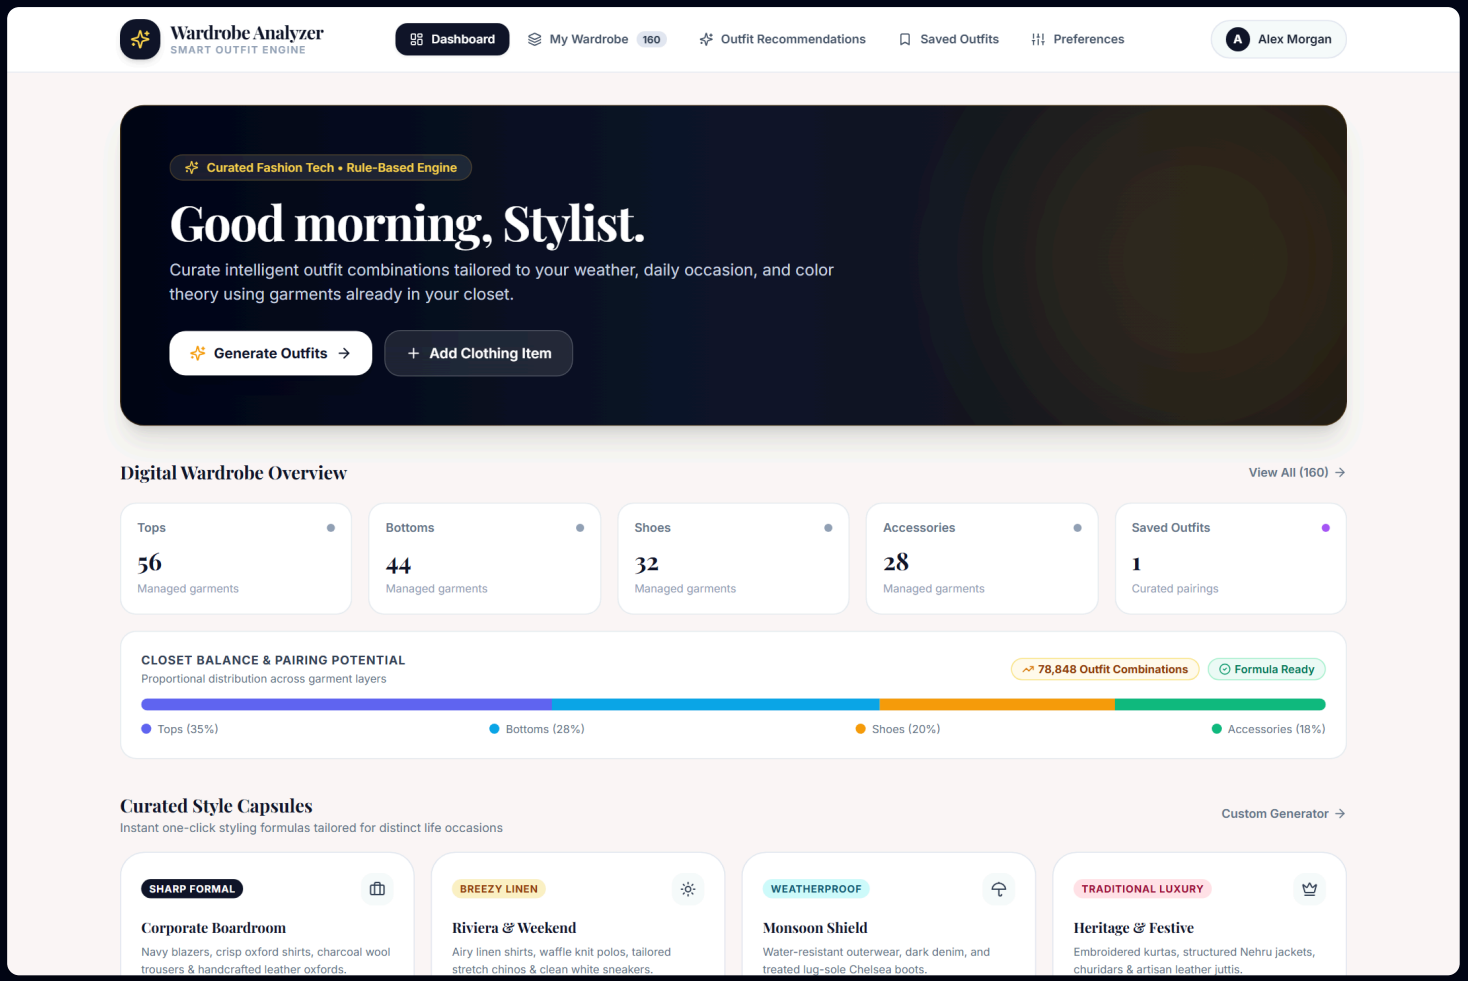

02. Haute Couture Registration

VIRTUAL WARDROBE ANALYZER

Secure registration screen featuring client-side password strength validation, confirm password match check, and optional 144-garment starter capsule collection preloading.

- Interactive password security checklist with real-time feedback
- Checkbox to automatically seed starter capsule wardrobe
- Seamless link to existing account login

High-level closet analytics featuring item distribution across 4 core categories, closet balance score gauge, and ready-to-wear seasonal capsule collections.

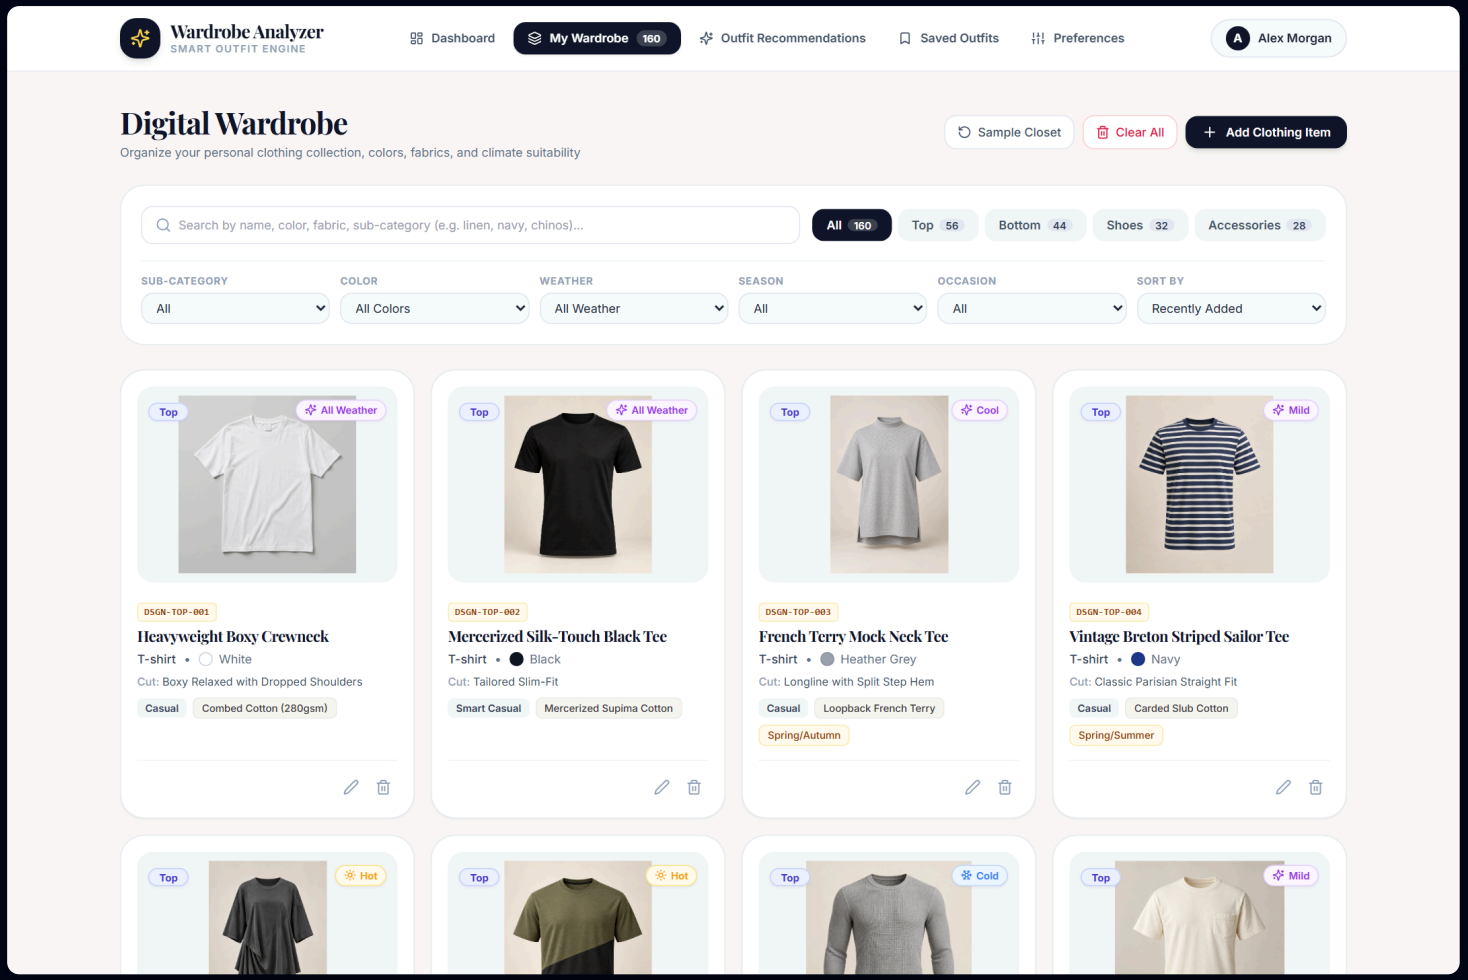

- Closet balance gauge computing over 1.5M potential outfit permutations
- Category counter tiles: Tops (40), Bottoms (32), Shoes (28), Accessories (44)

- Curated style capsules (Smart Casual, Business Formal, Summer Resort, Winter Warmth)

GARMENT MANAGEMENT /wardrobe

04. Digital Wardrobe Grid

VIRTUAL WARDROBE ANALYZER

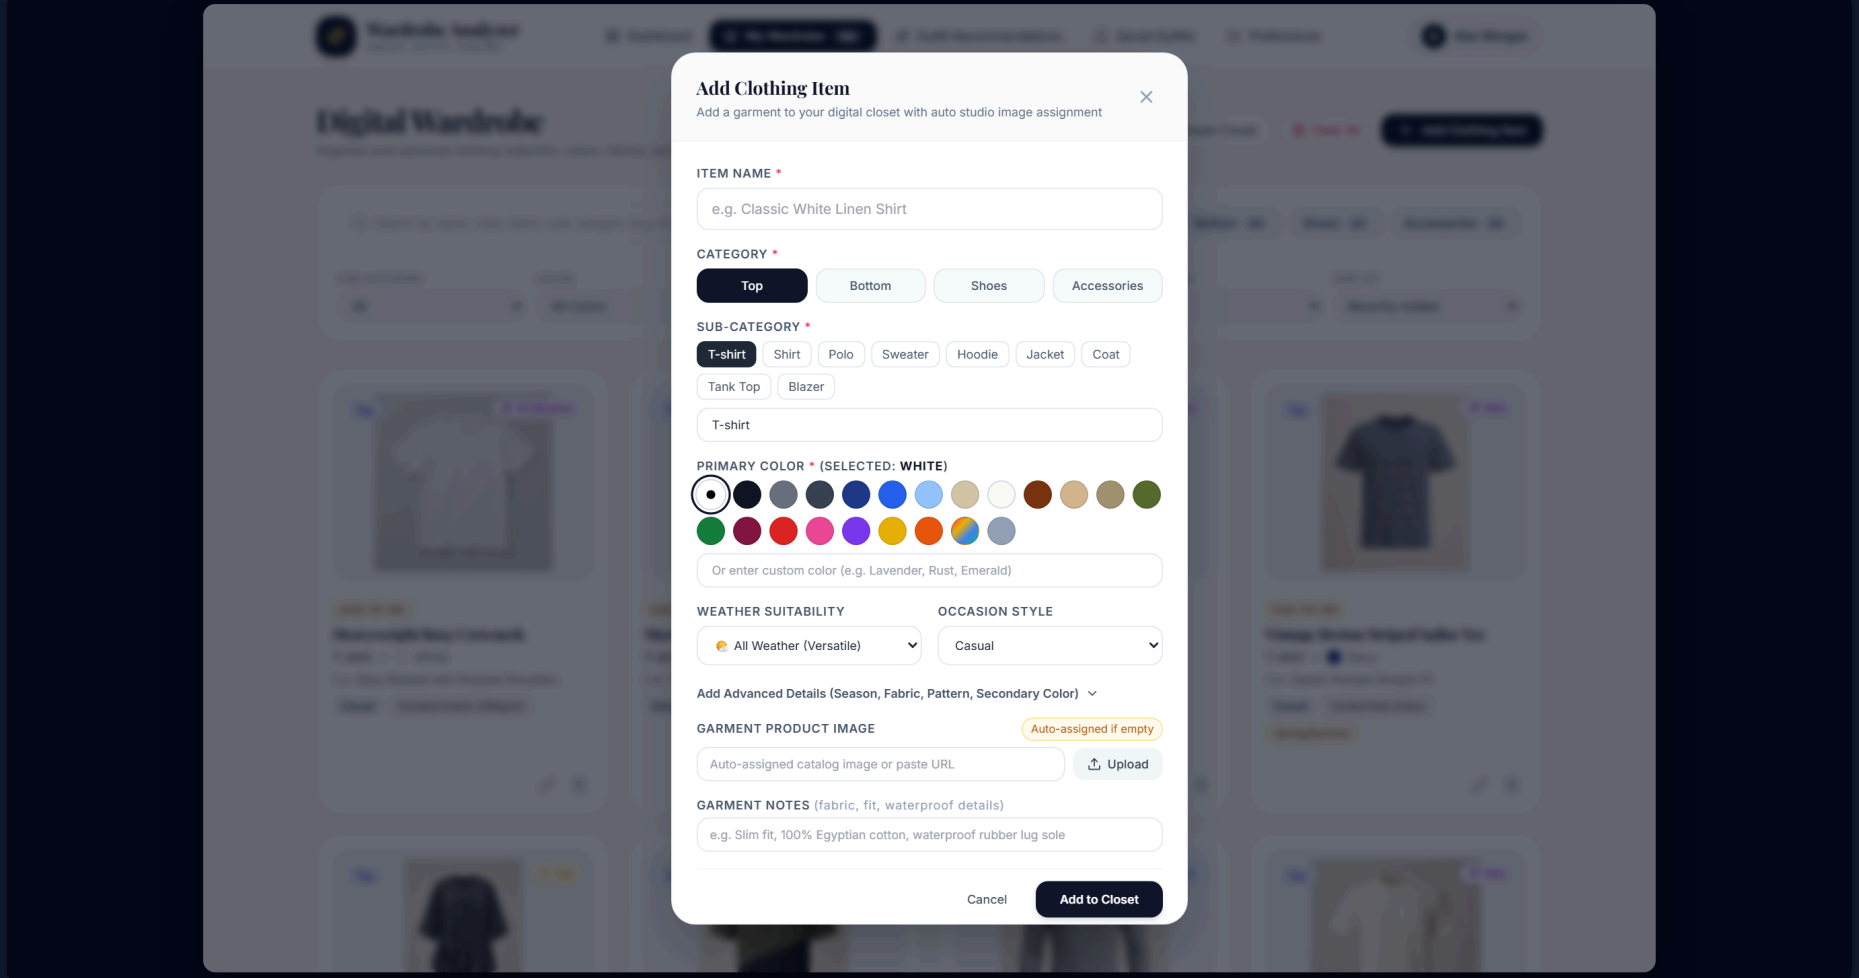

Visual digital closet displaying all 144 garments with AI-assigned studio product photography, multi-attribute filter bar, color swatches, and subcategory chips.

- Comprehensive multi-filtering: category, occasion, weather, and color palette
- Individual garment cards with color chips, subcategory, and weather tags

- Instant search and active filter reset

INTERACTIVE CREATOR `/wardrobe (Modal)`

05. Add Clothing Item Modal

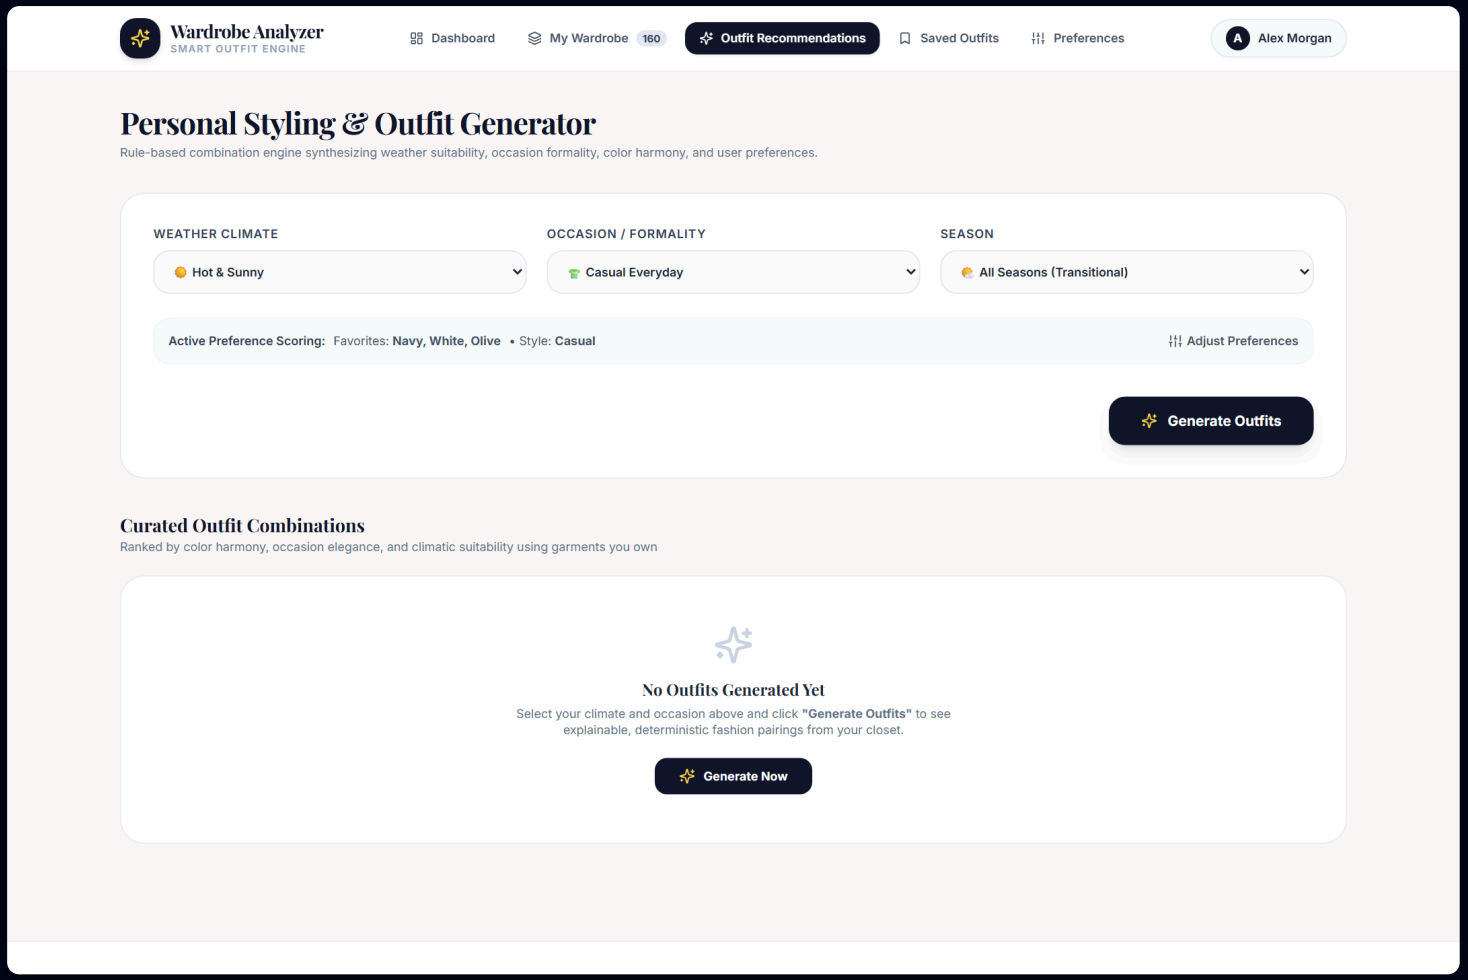

Comprehensive garment creation modal with dynamic subcategory chips, 14-shade visual color palette with hex swatches, occasion tags, and auto-image assignment.

- Subcategory selector automatically adjusts based on selected Category
- 14-color visual swatch grid with instant active selection border

- Occasion & Weather suitability tags with intelligent catalog image binding

AI STYLIST CONTROLS `/recommendations`

06. Styling Recommendation Controls

Context filter interface allowing users to tune climate, occasion, season, and color preference weights before triggering the outfit recommendation algorithm.

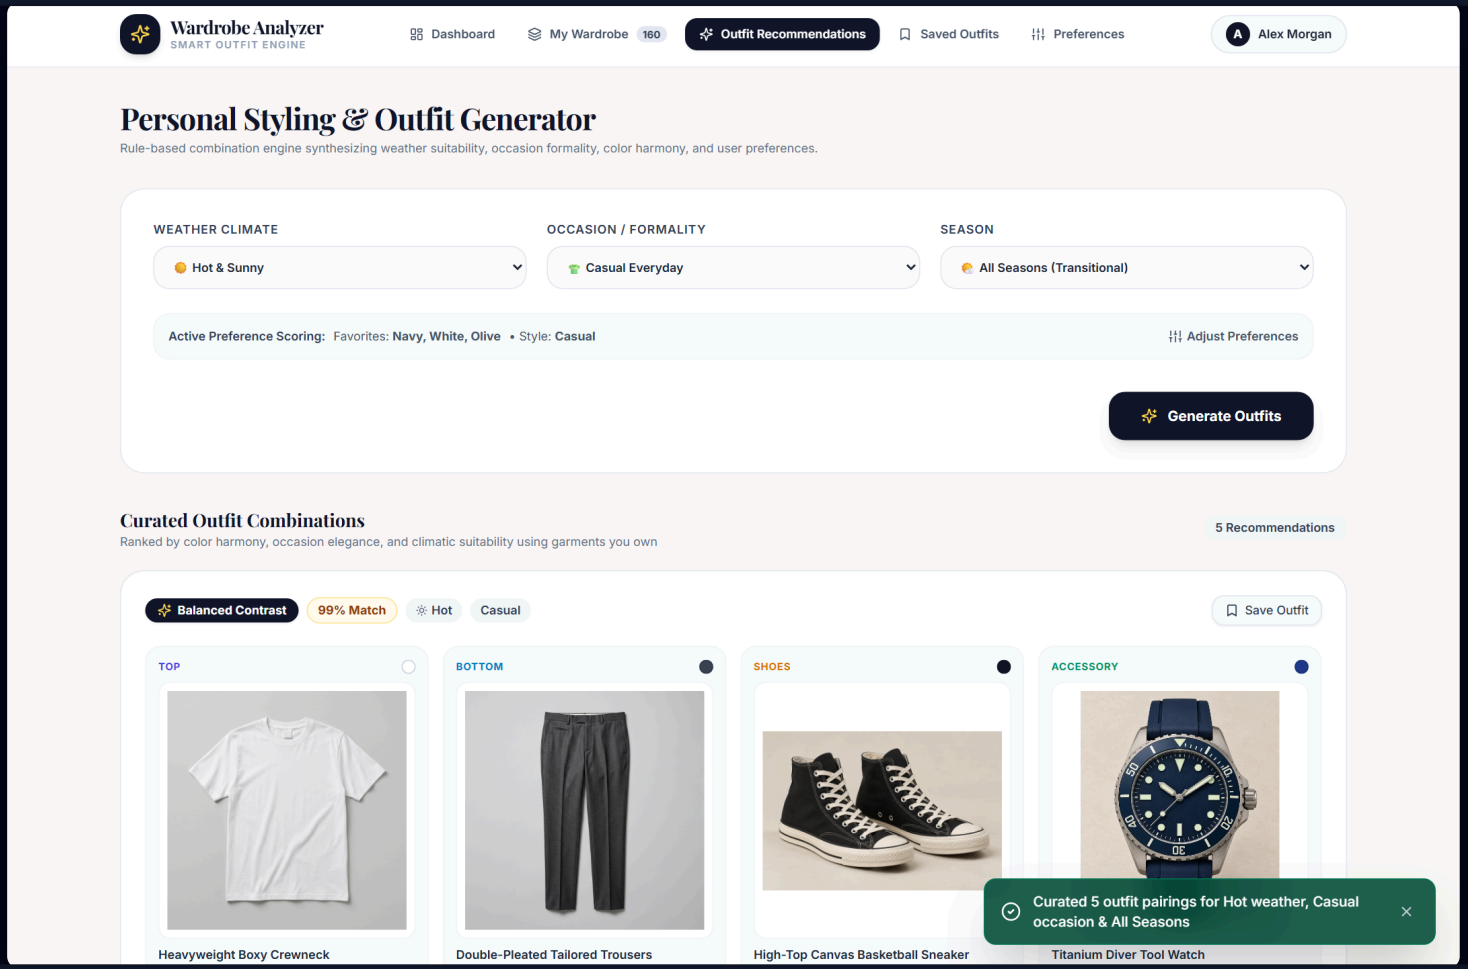

- Weather filter options: Hot, Mild, Cool, Cold, Rainy
- Occasion filter options: Casual, Smart Casual, Business Formal, Evening, Loungewear

- Quick action to pull in personal favorite and disliked color preferences

RECOMMENDATION RESULTS `/recommendations (Results)`

07. Curated Outfit Recommendations

VIRTUAL WARDROBE ANALYZER

Rule-based outfit generation results featuring coordinated 4-piece ensembles (Top + Bottom + Footwear + Accessory), compatibility scores (up to 99%), and stylist rationales.

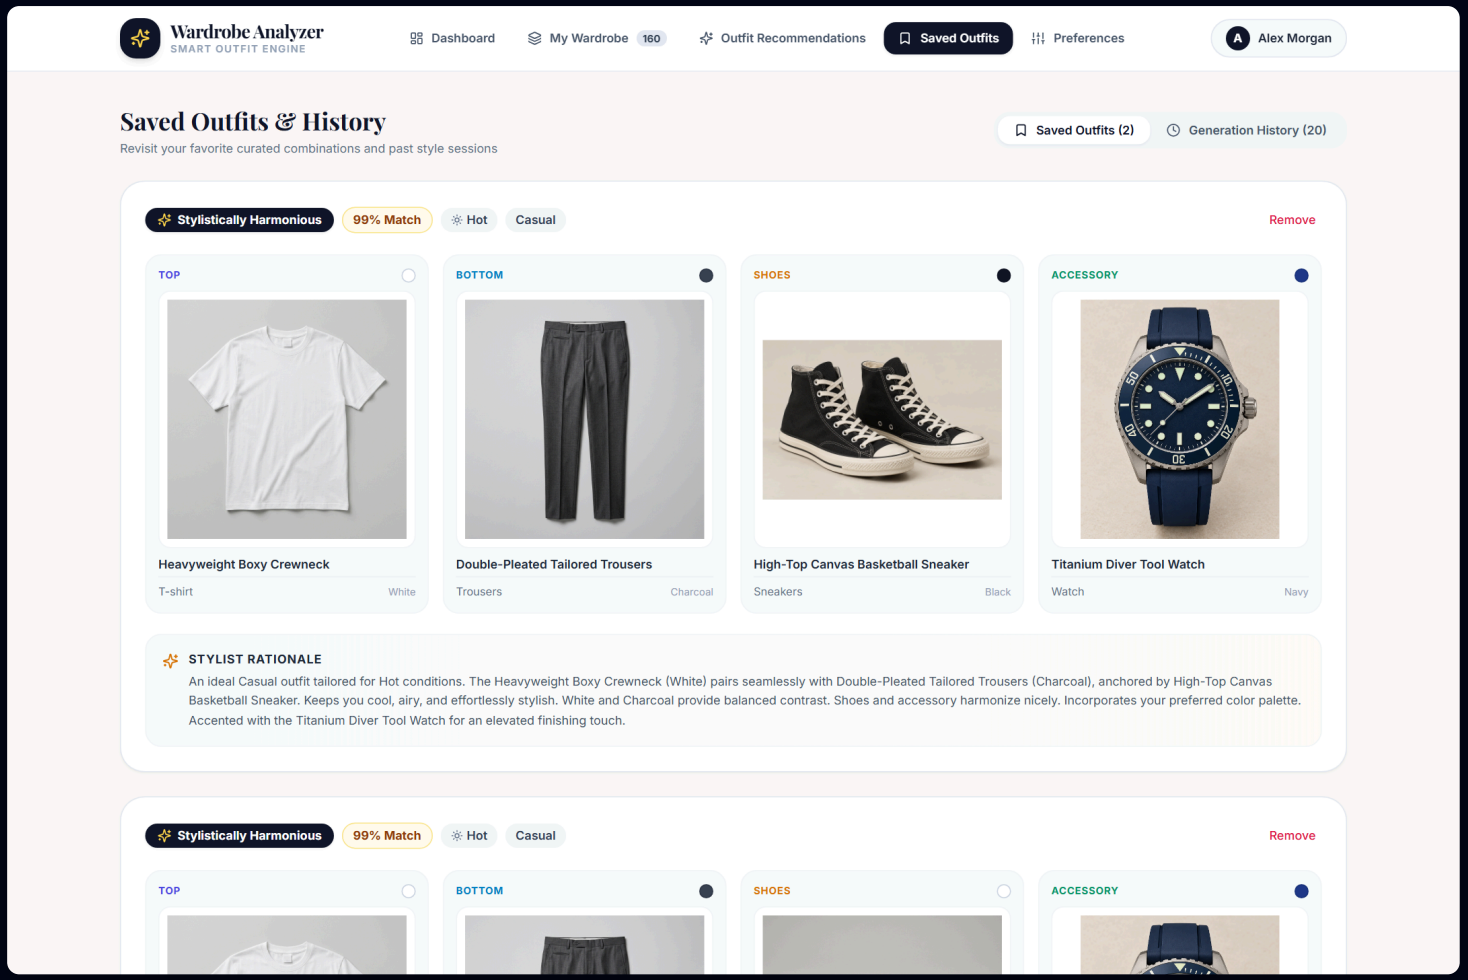

- Strict rule enforcement: Top + Bottom + Shoes + optional Accessory
- Color harmony scoring, fabric weight consistency, and style alignment

- Atelier compatibility match badge with 1-click "Save Outfit" bookmarking

LOOKBOOK & LOGS `/saved-outfits`

08. Saved Outfits & Styling History

VIRTUAL WARDROBE ANALYZER

Personal lookbook storing saved outfits with complete component breakdowns, stylist notes, and an audit table of past styling session queries.

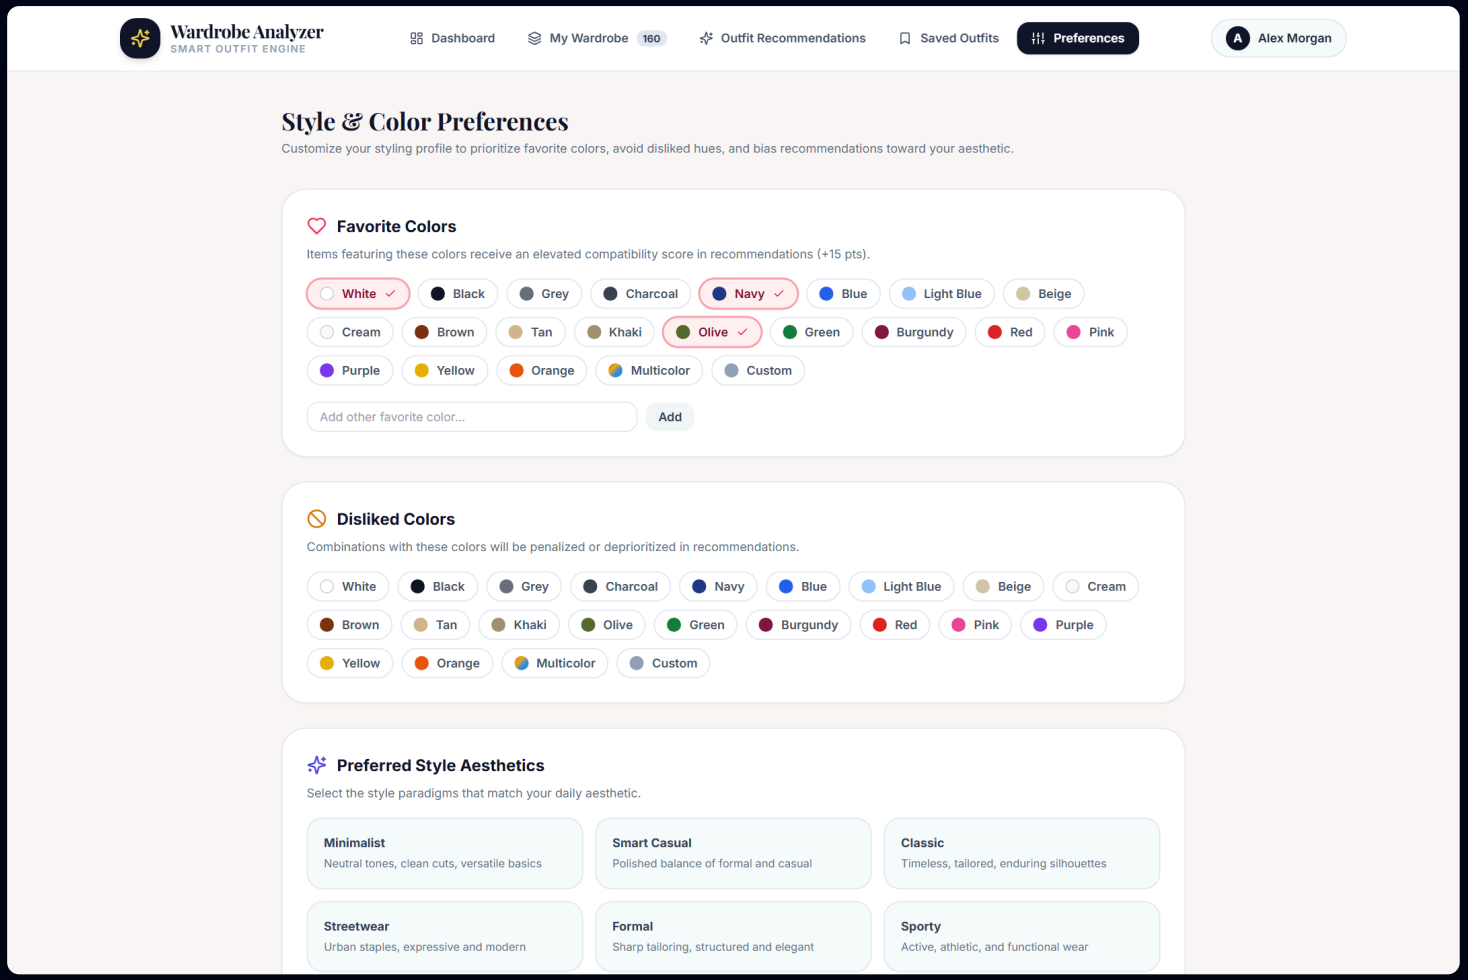

- Permanent bookmarks of curated looks with weather and occasion badges
- Detailed item breakdown tiles with individual product images

- Styling session history log recording timestamps and generated match counts

STYLE CUSTOMIZATION /preferences

09. Personal Style & Color Preferences

VIRTUAL WARDROBE ANALYZER

User styling profile configuration allowing custom selection of favorite colors (boosted scores), disliked colors (avoided hues), and core aesthetic archetypes.

- Dual color selector: Favorite Colors vs. Disliked Colors
- Aesthetic archetype toggles: Minimalist, Classic, Streetwear, Old Money

- Default weather and occasion settings applied automatically during recommendation
